Professional Summary

AI Agent Developer and Full Stack Software Engineer with around 6 years of experience in software development, banking applications, and AI-powered automation. Experienced in developing scalable applications using Python, FastAPI, React, and PostgreSQL. Skilled in integrating Large Language Models (LLMs) into intelligent automation workflows using LangChain and LangGraph. Currently developing production log monitoring and Jira ticket creation agents to support incident analysis and ticket automation. Familiar with Retrieval-Augmented Generation (RAG), semantic search, embeddings, metadata-based retrieval, and knowledge indexing. Working on local AI agents for code generation, development assistance, and code review. Experienced in REST API development, database integration, and microservices-based application architecture. Strong background in connecting AI capabilities with existing software systems to improve development workflows and operational efficiency. Focused on building reliable, context-aware AI agents that support software development, troubleshooting, and enterprise automation.

Professional Experience

DANFISHEL DIGITAL SOFTWARE SOLUTIONS Ltd | Chennai, Tamil Nadu
Aug 2024 – Present

Senior Software Engineer

- Developing AI-powered agents and maintaining banking applications by combining LLM integration, intelligent retrieval, agent workflows, and full-stack engineering.
- Production Log Monitoring & Jira Ticket Agent - Developing an AI agent to analyze production logs, identify potential issues, retrieve relevant context, and support automated Jira ticket creation.
- Implementing retrieval-based AI workflows using RAG concepts, semantic search, embeddings, and metadata filtering to retrieve relevant technical information
- Exploring metadata, semantic, and graph-based indexing to connect technical documentation and code context for improved AI-driven analysis.
- Developing local AI agents to assist with code generation, development tasks, and automated code review using LLMs and agent orchestration frameworks such as LangChain and LangGraph.
- Develop and maintain banking applications and backend APIs using Python, FastAPI, React, and PostgreSQL, supporting business logic, database operations, and application integrations.

SOFTSQUARE SOLUTIONS Pvt Ltd | Chennai, Tamil Nadu
Aug 2022 – July 2024

Software Engineer – Full Stack Web Developer

- Developed and enhanced scalable full-stack applications, delivering new features and maintaining production systems
- Built applications using React.js, Django, and Node.js, designing RESTful and GraphQL APIs with PostgreSQL

- Designed REST and GraphQL APIs supporting multi-module application architecture
- Optimized database performance through indexing and query tuning, reducing execution time by 20–25%
- Participated in code reviews and contributed to improving code quality, maintainability, and development best practices

SELTAM TECHNOLOGIES SOLUTIONS Pvt Ltd | Chennai, Tamil Nadu
May 2021 – May 2022

Python Developer

- Developed and delivered client-specific applications with end-to-end testing, ensuring high-quality releases
- Built a bulk SMS platform capable of handling thousands of messages per day
- Integrated Python applications with embedded systems for efficient processing
- Implemented WebSocket-based real-time communication features
- Deployed and maintained applications on AWS, achieving high system availability

ILIFE TECHNOLOGIES | Trichy, Tamil Nadu
Oct 2020 - April 2021

Python Developer

- Independently developed and managed a full-stack web application, improving usability and accessibility
- Designed and developed responsive applications using Django and frontend technologies
- Built REST APIs to enable system integration and communication
- Developed Python automation tools, reducing manual effort in operations
- Conducted end-to-end testing and deployed applications on cloud platforms ensuring scalability

Education

Master of Computer Application – Computer Application | Nehru Memorial College, Trichy, Tamil Nadu

Bachelor of Science – Computer Science | Kurinji College of Arts and Science, Trichy, Tamil Nadu

Technical Skills

- Python
- PostgreSQL
- Semantic Search
- LLM Integration
- FastAPI
- Agentic AI
- Graph-Indexing
- AWS
- React.js
- RAG
- Vector DB
- Git

Certifications

- Programming in Advanced Python, C and Java | T4TEQ Software Solutions
- Front-End Web Development | Udemy
- MuleSoft Developer level 1 | MuleSoft
